Training Syllabus / Schedule

Candidates who are local residents will go through four nights of intensive classroom training, two pool sessions and finally one weekend of diving onboard MV THE ARK from a Fri evening till a Sunday night to complete at least 6 dives.

Foreigners visiting or flying in for the prog can do a full three days classroom session followed by a full day of pool session with breaks in between and then finally a weekend onboard MV THE ARK for the training dives to be completed.

All candidates must bring with them their own Basic dive equipment (tropical set up)

For any further clarification, Pls contact

Friendly Waters at : info@friendlywaters.com.sg or +65 65570016

INSTRUCTOR

Our JJ CCR trainer, Dave Yiu has been actively involved in Technical diver training for well over a decade in Singapore and Malaysia. A well experienced Instructor Trainer with IANTD, TDI, IART, RAID and SSI. Dave is solely responsible for establishing a fully equipped tech diver training resort in Malaysia and now his very own Liveboard, MV THE ARK. Pioneering many of the wreck explorations in the South China Sea since the mid 90s, he is actively involved in the many expeditions still on going today. The JJ CCR is his choice of electronic close circuit rebreather as it is undoubtedly today's most reliable and well designed unit on the market.

He says "There are not many RBs out there that just keeps on diving and diving hassle free. Once you start on a JJ, you just don't look back.."

Welcome to the world of silent and bubbleless diving

Dave Yiu
